EXPERIENCE

PitchPrint, Cape Town — *Software Developer*

August 2024 - March 2026

- Design, develop and maintain production web applications using Vue.js, React, JavaScript, and PHP
- Architecting and developing a real-time chatbot interface using Vue.js
- Integrate third-party REST APIs and WebSocket services
- Collaborate with product and design teams to scope and implement new features
- Participate in code reviews and maintain code quality standards
- Debug and optimise performance issues across frontend components
- Contribute to UI improvements using Tailwind CSS

Humanise Designs, Cape Town — *UI/UX designer*

September 2019 - September 2020

Duties: I was focused on all aspects of a product's development, including design, usability, functionality, and even branding and marketing. My work touches the entire end-to-end journey of a user's interaction with a product using Adobe Suite tools. I also worked with HTML, CSS, and JavaScript to create landing pages.

Technical Skills - Frontend

- Vue.js
- React
- JavaScript
- Tailwind CSS
- HTML5, CSS3
- Adobe Suite

Technical Skills - Backend

- PHP
- Node.js
- REST APIs
- MySQL

Tools & Practices

- Git and GitHub
- API Integration
- Cross-functional collaboration
- Code reviews

Plugins

- WordPress
- Shopify
- WooCommerce

EDUCATION

CodeSpace Academy, Cape Town — *Certificate*

January 2024 - June 2024

Completed a software development programme focused on modern web technologies, software design principles, and collaborative development practices.

CAREER OBJECTIVES

Software Developer with hands-on experience in architecting and building interactive web applications using Vue.js and modern frontend patterns.

Experienced in designing scalable component structures, managing complex application state, and integrating real-time WebSocket APIs. Strong focus on performance, maintainability, and clean code principles. Comfortable owning features end-to-end, from technical design to implementation and optimisation.
